

**No time to
visit tradeshows?
We'll come to you
with our mobile exhibition.**

You can't go to every tradeshow, we can't exhibit at every one.

Therefore, we operate a mobile exhibition which we would like to show you right at your doorstep.

Our sales engineers are looking forward to informing you on our product range and assisting you in the selection and application of Camille Bauer devices. We will take time to discuss your concerns.

Exhibition program

We will show you devices from the following areas:

- Transducers for power mains
- Status monitoring in power mains
- Remote monitoring of power mains
- Monitoring of energy distribution in power mains
- Angular position engineering
- Modular temperature control systems
- Process control engineering
- Analogue signal isolators

Technical data of the CB mobile exhibition vehicle
